

SHERBROOKE UNIVERSITY

Program Director: Catherine Anku-Bertholet
3001 12e Ave Nord, Sherbrooke QC, J1H 5N4

FAQ

1. What are you looking for specifically in an impressive candidate?

- i** A very good performance in her/his ob/gyn rotation
- A deep motivation and interest for ob/gyn
- Good academic performance during med school
- Leadership

2. What can a potential candidate do now in order to be an appealing applicant to your program?

- i** Improve his/her academic performance
- Perform well in ob/gyn rotations and show his/her interest
- Research projects

3. How is your residency program organized?

- i** **PGY-1 Rotations**
- 4 months ambulatory obs/gyn (including one month of family planning)
- 1 months general surgery (including 1 month intensive care unit)
- 1 month infectious disease
- 1 month internal medicine (pre-op)
- 1 month surgical intensive care unit
- 1 month birth planification clinic
- 1 month neonatology
- 1 month plastic surgery
- 2 months obstetrics (birthing unit)

PGY-2 and 3 Rotations

- 3 months obstetrics
- 5 months gyne surgery
- 2 months ultrasound
- 1 month pathology
- 1 month colposcopy
- 2 months gynecology-oncology
- 2 months MFM

1 month research
2-3 months in community health center (gyne-obstetrics) **per year**
2 months elective
1 month endocrinology
1 month genetic

PGY-4 Rotations

3 months gynecology-oncology
4 months reproductive endocrinology and infertility
3 months maternal-fetal medicine
2 months uro-gynecology
1 month research

PGY- 5 Rotations

4 months senior gyne
4 months senior obstetrics
5 months for electives rotations

4. What is your residency program's orientation and focus?

i A complete formation in a friendly environment and an excellent staff-resident relationship

5. What is the availability of experiences in subspecialty areas during training?

i After PGY 4, all of our residents feel confident in treating these specific problems. Some residents choose to do an elective month in a private fertility clinic to see more of the assisted reproductive techniques.

6. What is the typical day in the life of a resident?

i All residents meet on the maternity floor at 7 am. Dispatch of the patients on the floor. Rounds until 8h-8h30. Clinics or operating room. We meet at 5 pm (most of the time) for the transfer on call. Of course, some residents are not necessarily at these meetings if they're in subspecialty or in other rotations with other departments. Every tuesday pm, each resident is off of his/her duty to assist classes and presentations. PGY-1 are now part of the surgery's common core.

7. What is the resident satisfaction?

- i** All of the residents are very happy with their formation and quality of life in Sherbrooke. Like in any program, there are difficult times but these are rare. If there is a personal or professional problem, we all feel that we have staff members to help us and guide us. Our program director is always available and her door is always open.

8. Are there sufficient elective opportunities during training to explore your special interests?

- i** Yes. Most of the senior residents have opportunities to explore special interests, even if it means going out of the province or country. Every few years, we have residents that do an elective rotation in another country.

9. What is the on-call schedule during each year of residency?

- i** At 5 pm, 2 residents (1 junior and 1 senior) are on call until 10 pm from Monday to Thursday. One resident is on call from 10 pm until 7 am every night for a week (3-4 weeks per year). On weekends, two residents are on call from 8 am until 8 pm; and one person is on call Friday night and Saturday night. If you work on the weekend, during the day, you're off on Monday. If you work on the weekend, during the night, you're off the Friday before the weekend. No more 24 hours !!! Junior residents (PGY1-2) are almost always matched (PGY1 are always matched) with a senior resident (PGY 4-5). PGY 3 can be junior or senior. Both sleep at the hospital and the staff member on call also. Senior and junior teaming gives a great opportunity for teaching.

10. What distinguishes your program from the other programs?

- i** Very close interaction between residents and professors.
No competition between the residents.

11. What distinguishes your city from others?

- i** It's a small city (80 000), but with a total of probably 125 000 including the suburbs. No traffic, ever! Beautiful mountains and rivers and lakes. Great outdoors activities. Since it's a university city, lots of students and great social spots.

12. How competitive is it to get in, and then to succeed in your field?

- i** About 40% get into the residency of their choice and then all residents succeed in their royal college exam (there is usually a resident, every 2-3 years, that changes to a different program)

13. Is there active and/or required research in your residency program?

i Yes. Every month we have meetings or research seminars. We are expected to have completed a full research project (protocol, ethics committee, consent form, recruitment, analysis, writing paper, presentation...) or start one and finish another.

14. What local, national or international conferences would benefit candidates interested in your residency program?

i *SOGC, APOG or AOGQ* conferences

15. Where can we look for more information?

i CARMS website
University of Sherbrooke website
